

Grow Your Business with 4Clicks

The premier construction estimating tool.

Developed by estimators for estimators, e4Clicks is the only completely integrated and fully developed estimating and project management software in the industry. Manage multiple projects, contractors, bids and estimates, cost books, and users. Track construction progress, documents, milestones, modifications, inspections, warranties, and closeouts quickly, easily, and with greater accuracy.

e4Clicks can also help you improve your client communications to the hard to reach government sector. In fact, today over 70% of the country's Air Force Bases, numerous Army Posts, and various other installations currently use e4Clicks. So, if you serve or seek to serve the government sector, e4Clicks empowers you to communicate more effectively and improve government client capture and retention.

With over 100 years combined experience in construction estimating, project management, and software development we designed e4Clicks to meet the needs of contractors - just like you. Plus, with a dedication to on-going service and training it's clear to see why we are an industry leader in managing cost-effective construction projects from planning to completion and beyond.

Estimating

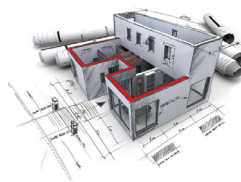

Save time, reduce errors, and improve efficiency

- ✓ Break free from spreadsheets and let our technology work for you
- ✓ Quickly access full line item descriptions, notes, takeoffs, crews, pricing info, and more
- ✓ Easily incorporate your own custom line items or integrate items from any industry guide
- ✓ Manage multiple estimates within each of your team's projects

eTakeoff Plan Viewer

The evolution of estimating

- ✓ Powerful virtual quantity take-off eliminates paper plans
- ✓ Measure and color code counts, lengths, and quantities with ease
- ✓ Measurements from multiple plan sheets are easily totaled
- ✓ Supports multiple file formats including PDF, DWG, and TIFF

Contract and Document Management

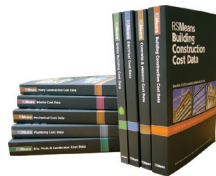

Get organized

- ✓ Organize, standardize, and share your electronic files and project documents
- ✓ Create templates that will auto populate with project data
- ✓ Run all of your contracts in one program
- ✓ Automatically link your line items to your construction specifications

RSMeans and IDIQ Pricing

Find your items in seconds

- ✓ Get more than an electronic book, get the best RSMeans data integration available
- ✓ Your RSMeans and IDIQ cost books are a click away
- ✓ Easily select from 400,000+ detailed line items as well as your customized items
- ✓ Enjoy the most powerful, intuitive search features

The 4Clicks Advantage

“By Estimators For Estimators” is more than a tagline, it defines the value and experience we apply daily to continuously improve our software and services and help make you, our clients and partners, be more productive. Our founder and core team members bring years of experience, whether serving as airmen for the United States Air Force or working as a licensed civilian professional engineer supporting repair, renovation, and construction projects.

4Clicks Partners also play a central role in enhancing construction project collaboration and knowledge. Our partners offer a wide range of valuable products and services - cost estimating, setting up JOC programs, developing UPB's or providing localized pricing and productivity rates.

Strategic Partners

Consultants

Our Clients

Thousands of Contractors, Subcontractors, & A/Es

Higher Education, County/State/Local Government, Healthcare...

World Class Training and Support

Professional training and support is required for the successful implementation of robust cost estimating and project management processes and associated technology. We believe 4Clicks offers the best training and support programs available. All training classes are certified for CEUs (AACEI).

- Hands-on training for better understanding and greater retention.
- Take-home training materials packed with rich, detailed information.
- Classes lead by cost estimators and project managers.

But don't take our word for it, here's an example of what our clients say:

“In my lifetime I've been in LOTS of training, some good, some not so good, some just miserable/hard to stay awake through...BUT...Not only was your training extremely informative, you kept us hopping and on our toes!”

Thank you for your obvious dedication to your firm, your knowledge of the software, your ability to hold your audience's attention, your constant encouragement and fun presentation . . . all of which help folks learn. I know I learned a lot today!”

– USAF Customer

“e4Clicks is fast. Quick does not adequately describe how rapidly a complete estimate can be compiled that is both accurate in scope and very informative to our clients of our intentions. Without e4Clicks, we could not support the work load per person that we currently achieve.”

– Contractor

I am indescribably happy with the software. Your trainers are fantastic. I wish more of our construction contractors had the professionalism and attitude your team displays. I can only imagine what it would be like to work on a daily basis with energetic, competent, and congenial people like those on your team.

Thank you. It's hard to believe software can make me want to come to work!

You should also be aware that the contractors and subs who started using the product are also VERY pleased. I think it has a little to do with the way we implement it into our JOC process.”

– DPW Engineering Technician
